

Blockchain standards at Horasis Global Meeting

During the 5th - 8th of May, 2018, the third Horasis Global Meeting was held in Cascais, Portugal, for 3 days. Over 600 people representing 70 countries took part in the event (attendance by invitation only). The audience varied mainly from the executives of huge 500 companies and several ministers of England to the presidents of smaller countries.

Main issues and our goals

Some essential topics have been resurfaced at the meeting, e.g. how to provide better education policies to the population in order to permit everybody to reveal and realize their potential. On the assumption of this issue, all employers around the world should recognize not only gender problems but also find the best ways for the achievement of true equality in job payment.

Our Chief Executive Officer, Mr. Henry Shterenberg, was honoured to become a representative of the Suntri Inc. at the Horasis Global Meetings. He had managed to establish new connections and productive relationships with the attendees and speakers. He was also invited to moderate a panel on the most popular blockchain.

Essential events

Our CEO handled everything most meritoriously with his regular energy, ardour, and enthusiasm. Suntri has received a great feedback from the panelists. Furthermore, the Head of Horasis, Dr. Frank Richter, personally thanked Henry Shterenberg and highly commended his work what led to a deeper discussion of the blockchain technology and Suntri's plans for future at the panel.

After his performance Henry Shterenberg was invited to take part in future conferences held in MIT and NY, Las Vegas, Istanbul, London, etc. We believe that the Horasis Global Meeting became a great opportunity for Suntri Inc. and an essential contribution in the strengthening of its relationships with the world key decision-makers and leaders.
